SEMINAR REPORTS OF UNITARY REPRESENTATION

No. 10, September 1990

Seminar Reports of Unitary Representation No.10

-contents-

S. Aoki and S. Kato: Connection formula for invariant eigendistributions on $U(p,q)/\{U(r)\times U(p-r,q)\}$	1
A. Bak: Nonabelian K-theory and the K-theory of Kac-Moody groups	...6
A.S. Dzhumadil'daev: Nonsplit extensions of Lie algebras and their irreducible representations	7
H. Fujiwara: Plancherel formula for monomial representations of nilpotent Lie groups	8
A. Guichardet: On some categories of (g,K) -modules	10
K. Hasegawa and Y. Yamada: Algebraic derivation of "Broken Z_N -symmetric" solutions for the star-triangle relations	13
A.G. Helminck: Some results on symmetric varieties	18
G.F. Helminck: Projective holomorphic representations of the restricted linear group	19
J.S. Huang: K -bi-finite and $Z(g)$ -finite functions	24
E. Kaniuth: The Pompeiu problem for groups	29
K. Kariyama: Note on Weyl-Harish-Chandra character formula for tamely ramified supercupidal representations of GL_n	32
T. Kawazoe: A method of reduction to the spherical case in harmonic analysis on real rank 1 semisimple Lie groups	37
T. Kobayashi: Discontinuous group in a homogeneous space of reductive type	41

K. Koike: Relative invariants of the polynomial rings over the finite and tame type quivers	46
A. Kowata: Spherical hyperfunctions on the tangent space of symmetric spaces	50
R.L. Lipsman: The Penney-Fujiwara Plancherel formula for homogeneous spaces with monomial spectrum	53
L.A. Mantini: Geometric realizations of unitary highest weight modules as solutions of differential equations	56
B. Ørsted: Spherical distributions on symmetric spaces	61
R. Penney: Poisson integrals for homogeneous, rank 1 Koszul domains in $\mathbb{C}^n$	64
S.A. Salamanca-Riba: On the unitary representations of $SO(n,m)$	69
N. Shimeno: Eigenfunctions of invariant differential operators on $U(p,q)/U(p-1,q)$	73
H. Singh: Second order differential equations in Lie groups	76
J. Soto-Andrade: Generalized Weil representations for $SL(n)$	86
K. Suto: Towards Kac-Moody Lie groups	91
I. Terada: A robinson-Schersted-type correspondence for a dual pair on spinors	96
S. Yamagami: Representations of non-semisimple and non-group object	99
I. Yokota: Realizations of involutive automorphisms σ and G^σ of exceptional linear Lie groups G	...101
M. Wakayama: The relation between the η -invariant and the spin representation in terms of the Selberg zeta function	...109
